

Sauna & Steam
Australia since 1971

Sauna & Steam Australia Pty. Ltd. A.C.N. 005 710 789

Things to remember

1. Epoxy grout to tiled areas.
2. 2100mm ceiling for best steam, see point 10 below.
3. Door to be sealed. Aluminium framed type is best.
4. Threshold to door and dependent on layout/available space maybe tiled walkway to bathroom is appropriate.
5. Floor waste required.
6. Powder coated aluminium ceiling. (check Dulux site for options)
7. Steam generator and controller located outside steam room/shower.
8. High temp drain required for generator.
9. Steam entry low / in a safe position to avoid burns.
10. Fall on ceiling to avoid drips.
11. Shower in steam room is a nice option.
12. Height of side windows, if any?
13. **Waterproofing is critical!**
